

Just in time for summer activities!

Dr. Robert Liljeberg, Orthopedic Surgeon and Jessica Pearlstein Johnson, Orthopedic Physician Assistant, are excited to offer the new waterproof FlexiOH®. It is the first of its kind- an orthopedic immobilizer that has the rigidity to hold the fractured part as well as ensuring proper skin ventilation. FlexiOH® comes as an easy to fix wearable material on the injured part. FlexiOH® can be removed without the use of any other external cast cutter or spreader. The design and the material of FlexiOH® are engineered to provide superior comfort to the patient. The FlexiOH® immobilizer is designed in such a way that the intermittent hollow spaces facilitate circulation of air and evaporation of sweat or water from the skin surface. Justin McCord was the first patient to receive the new immobilizer from Jessica Johnson.

Remarkable People...Remarkable Care!
